

SilverCut-250

Hand cutting torch for gas mixing cutting nozzle

The SilverCut-250 is a hand cutting torch for gas mixing cutting nozzles. It is long living as well as robust and due to the well balance safely to handle. The triangle structure of the gas pipes account for stability. The gas mixing technique reduces flash backs and protects the cutting torch from defects. While exchanging the cutting nozzles the gas type (acetylene, propane, mapp gas or natural gas) and the material thickness, which to cut, can be appointed.

- Gas mixing hand cutting torch
- Gas pipes triangle structure

SilverCut-250

Cutting range	3-250 mm
Torch head	90°
Total length	495 mm
Weight (kg)	1,0 kg
Type of gas	Acetylene, propane, natural gas and mapp gas

Scope of delivery

- Hand cutting machine
- Operation instructions

Your cutting needs – achieved.
